DATE

Blackford Solar Energy, LLC (“Blackford Solar”) is proposing the development of a 150-megawatt (MW) solar facility on approximately 1,250 acres of privately-owned land in Jackson Township, Blackford County, Indiana. The project will connect to AEP’s electric system via a new switchyard along the Keystone-Desoto transmission line.

Blackford Solar is expected to operate for 30+ years, providing significant economic investment to the community, a substantial property tax base for the County and schools, and generate emission-free renewable energy.

Blackford Solar obtained a Special Exception Permit from the Blackford County Board of Zoning Appeals and is currently in late-stage development. Construction of the project is expected to begin construction in late 2024/early 2025, bringing an influx of new jobs to the community. The Project is expected to begin operating by late 2025 or early 2026.

SOLAR BENEFITS

Solar energy facilities are a beneficial, temporary, and low impact use of land. Benefits of solar projects include:

- Substantial property tax contributions which add low impact, assessed value to the region.
- Approximately 300 new full time equivalent jobs during construction.
- Once operational, the solar facility is a passive use of the land and will not generate substantive amounts of traffic, dust, odors, or other nuisances.
- Creates no emissions and requires limited amounts of water during operation.
- Land will be stabilized and seeded, allowing the land to regenerate and for the soil to rest.
- At the end of operations, equipment is removed, and the land restored to prior use.

PUBLIC ENGAGEMENT

Blackford Solar is committed to being a dedicated member of the community and to work hard to earn the trust of our neighbors. Our engagement with the community goes well beyond job creation, economic investment, and providing clean, renewable energy. We strive to build lasting partnerships with civic leaders, property owners, and community members. We pride ourselves on being transparent in our communication and highly responsive to public feedback throughout the life of the project. We also believe being involved means giving back. We get to know our neighbors and have a long history of supporting local causes the community is passionate about. Whether through employee volunteer opportunities or corporate-level sponsorships, we are always looking for positive ways to stay actively engaged with the community and to serve as a good corporate neighbor.

ABOUT

Blackford Solar, LLC is a wholly owned subsidiary of Leeward Renewable Energy (LRE), a leading renewable energy company that owns and operates a portfolio of 26 renewable energy facilities across nine states totaling approximately 2,700 megawatts of generating capacity. LRE is actively developing and contracting new wind, solar, and energy storage projects in energy markets across the U.S., with over 25 gigawatts under development and construction, spanning over 100 projects. LRE is a portfolio company of OMERS Infrastructure, an investment arm of OMERS, one of Canada's largest defined benefit pension plans with C\$124.2 billion in net assets (as of December 31, 2022).
